

We are excited to begin our Program this coming week. We would greatly appreciate your support in encouraging your students who need help with homework to come by after school. We will also provide healthy snacks. We will be expanding our programs later in the school year to include STEAM activities as well as a healthy living programs.

One of our goals is to reach out to Bolton families to provide a positive and supportive partnership.

We also welcome your suggestions as to how we can support one another in building a "Healthy Eco-System that displays Community Collaboration leading to Student and Family Success!
